TRAIN TO | TRADE™

InteliBrain-Powered Trading. Performance-Based Rewards.

PRODUCT WHITEPAPER

OVERVIEW

Welcome to Train To Trade™

Welcome to **Train To Trade™**, an IntelliBrain-powered trading education and performance platform designed to help users develop trading skills through intelligent market analysis and AI-assisted trading.

Train To Trade™ combines artificial intelligence, market analysis, trading education, and performance-based incentives into one intelligent ecosystem.

This is **not** a fixed-income or guaranteed-return program. AI Performance Rewards are earned **only** when a completed live trade generates a **verified realized net profit**.

ENGINE

Multi-AI Intelligence Engine

Train To Trade™ is powered by an advanced **Multi-AI Intelligence Engine** that combines the strengths of **12 or more leading artificial intelligence models**.

Instead of relying on a single AI model, the platform utilizes a collaborative AI architecture where multiple AI models contribute market analysis, technical interpretation, reasoning, sentiment evaluation, and risk assessment before generating trading insights.

The AI ecosystem may include technologies from providers such as:

OpenAI GPT	Google Gemini	DeepSeek
Grok	Claude	Llama
Mistral	Qwen	Gemma
Phi	Cohere Command	More, continuously integrated

Each AI contributes different analytical strengths, allowing the platform to compare perspectives, improve confidence scoring, reduce analytical bias, and strengthen overall trading intelligence.

As artificial intelligence technology continues to evolve, Train To Trade™ is designed to integrate future AI innovations to further enhance market analysis and trading decision support.

MECHANICS

How Train To Trade™ Works

Users begin by selecting their preferred trading capital and activating their chosen VIP level.

The AI continuously analyzes live market conditions and generates intelligent trading opportunities based on market data, technical analysis, and risk management.

While users monitor and learn through the **Train To Trade™ interface**, the system utilizes a **Live Mirror Trading** architecture, allowing qualified trades to be executed in the connected live trading environment while simultaneously displaying the trading process inside the training platform.

This enables users to experience AI-assisted trading within an educational environment while actual trading performance is measured from completed live market trades.

Every completed trade is automatically recorded, analyzed, and evaluated by the system.

ARCHITECTURE

Live Mirror Trading

Train To Trade™ operates using a **Mirror Trading** system.

The activity shown inside the Train To Trade™ dashboard reflects the corresponding live trading activity executed through the connected trading account.

The training interface allows users to monitor:

- AI market analysis
- Trading signals
- Entry and exit positions
- Risk management
- Trade history
- Performance analytics
- AI Performance Rewards

The training interface is designed to educate users while transparently presenting the outcome of qualified live trading activities.

TIERS

VIP Levels

VIP 1 MAXIMUM ELIGIBLE PROFIT / TRADE 10% AI PERFORMANCE REWARD 10% of Net Profit	VIP 2 MAXIMUM ELIGIBLE PROFIT / TRADE 20% AI PERFORMANCE REWARD 10% of Net Profit	VIP 3 MAXIMUM ELIGIBLE PROFIT / TRADE 30% AI PERFORMANCE REWARD 10% of Net Profit
---	---	---

The AI Performance Reward percentage remains **fixed at 10%** for all VIP levels.

The difference between VIP levels is the **Maximum Eligible Profit** that may qualify for reward computation.

WORKED EXAMPLE

Sample Computation

TRADING CAPITAL			\$500
VIP 1 · Max 10% $\\$500 \times 10\%$ \$50 Net Profit $\\$50 \times 10\%$ \$5 Reward	VIP 2 · Max 20% $\\$500 \times 20\%$ \$100 Net Profit $\\$100 \times 10\%$ \$10 Reward	VIP 3 · Max 30% $\\$500 \times 30\%$ \$150 Net Profit $\\$150 \times 10\%$ \$15 Reward	
FINAL AI PERFORMANCE REWARD			
\$5			
\$10			
\$15			

REFERENCE

Reward Summary

VIP LEVEL	MAXIMUM ELIGIBLE PROFIT	VERIFIED NET PROFIT (\$500 CAPITAL)	AI PERFORMANCE REWARD (10%)
VIP 1	10%	\$50	\$5
VIP 2	20%	\$100	\$10
VIP 3	30%	\$150	\$15

Only verified realized profits generated from completed live trades qualify for AI Performance Rewards.

The AI Performance Reward is always calculated as **10% of the Verified Realized Net Profit**, regardless of VIP level. The VIP level determines only the **Maximum Eligible Profit**, not the reward percentage.

RULES

How AI Performance Rewards Are Calculated

AI Performance Rewards are calculated **only** from verified realized net profits. Rewards are **never** calculated from:

- Total trading capital
- Unrealized (floating) profits
- Guaranteed daily income
- Deposited funds
- Simulated trading results
- Fixed investment returns

If a trade does not generate a verified realized profit, no AI Performance Reward is earned.

No Realized Profit = No AI Performance Reward.

MODEL

Performance-Based System

Train To Trade™ follows a transparent performance-based model. Rewards are earned only after:

- A qualified trade is completed.
- The trade closes successfully.
- A verified realized net profit is generated.
- The AI Performance Reward is calculated based on the user's active VIP level.

Trading performance depends on actual market conditions, AI-generated trading signals, execution quality, user participation, and proper risk management.

Past performance does not guarantee future trading results.

ACCOUNTABILITY

Transparency

Every qualified trade is recorded within the Train To Trade™ platform. Users can review:

- Trading history
- Realized profits
- Performance analytics
- AI-generated trade analysis
- AI Performance Rewards

The system is designed to provide a transparent learning environment where users can continuously improve their trading knowledge while tracking verified trading performance.

OUR PRINCIPLE

Train with Intelligence.

Trade with Discipline.

Improve Through Experience.

Earn Based on Verified Performance.

TRAIN TO TRADE™

Powered by IntelliBrain Intelligence.

Driven by Real Market Performance.

Built for Continuous Trading Education.
